

## Emergency Calls: Guidelines for teachers

### Abstract

The task is set in a police district office. Data (presented in a spreadsheet and diagrams ) of the performance of the teams in case of immediate response incidents is analysed to answer the question: are incidents dealt with within target times?

### Preparation:

- Make copies of the student worksheet
- Optional: Excel

### Example lesson plan:

- |        |  |
|--------|--|
| 5 min  | Students are introduced to the work area of a Police Force. Have students read the text under 'background'. In a whole class discussion students are using their own words to explain the context.   |
| 30 min | The students start to work on the task data and interview (worksheet).<br>When students work in pairs they on this task they can later share their findings with another pair, before you start a whole class discussion.<br><br>Alternative task (optional): Ask students to create a similar table in Excel. |
| 10 min | Sharing and discussing.  |
